There are no barriers between sonographer and patient on the Echo Pro table, allowing correct scanning posture to prevent musculoskeletal injury. The cardiac scanning cutout provides open access to the patient's left thorax area for an unobstructed apical approach. The motorized Fowler back is infinitely adjustable to 80° via hand or foot controller.

The Echo Pro Combination Table is so accommodating it reduces the total amount of time required to achieve a quality image. Patient comfort is assured even through lengthy procedures by cushioned arm supports, a thick mattress and a unique swing-out cardiac scanning cutout cushion that doubles as an armrest.
