

MRI MANOMETER

Mounted on an adjustable, mobile pole, this non-magnetic mercury manometer has full 300mm/Hg calibration. Each manometer has an individually calibrated cartridge tube, resiliently mounted and completely recessed in aluminum scale with permanent, easy-to-read numerals on black anodized scale. The inflation system includes latex bag with Air-Flo™ control and

latex bag with tubing and standard adult cuff. A non-magnetic basket is included to hold bulb and cuff assembly.
