

MRI OXYGEN DELIVERY

The Oxygen Tank and Tank Cart were designed for each other to maximize easy mobility.

This size Oxygen "E" Tank is made of high quality aluminum alloy, ideal for an MRI department where non-ferrous materials are a must. The tank has a green top for easy identification and has a brushed finish with clear coating for low maintenance.

Designed for magnetic resonance imaging, the Oxygen Regulator is also constructed of metals which are unaffected by magnetic fields.

The lightweight, stainless steel Oxygen Tank Cart (10 lb) is contoured for easy transport of the tank. A 1/2" diameter hook allows the cart to attach to beds or gurneys during patient transport. Constructed of high quality stainless steel.

Tank, Cart and Regulator are sold separately.

SPECIFICATIONS:

240-365 Oxygen Tank

Dimensions: 29" h x 4.5" dia (74 x 11 cm)

Compliance: MR Conditional; tested with Philips Interea 1.5T System

Weight: 13 lb (6 kg)

*Exceeds DOT Specifications

- 240-365** Oxygen Tank, MRI
- 240-367** Oxygen Regulator, MRI
- 240-366** Oxygen Cart, MRI
